1 FOREWORD

.....

Get ready for an adventure in education; you will learn many new and exciting concepts.

Balsam Academy believes in a personalized approach to instruction leading to mastery within a positive and enjoyable learning environment. Founded in 2004, its fundamental goal is to prepare students not only for successful further schooling, but also for the difficulties that will be encountered in the changing social, economic, and political environment of the modern world.

Balsam recognizes the importance of offering a constructive, wide-ranging, and structured program.

This handbook is intended for both new and continuing students and their parents. It has been produced in an effort for you to understand some of our expectations and goals in working with you.

We are mindful that in an international community, students will leave to continue their education elsewhere. Therefore, we equip students with the skills and knowledge they will need to be successful in their next school and throughout life.

We encourage parents to participate in events and help the students enjoy their learning experiences here. We encourage parents and students to give feedback that will enhance the educational experiences. We believe our relationship with students and parents is key to our success and we hope this document will give helpful information. Best wishes as you become part of our school community.

WELCOME TO BALSAM ACADEMY

We especially welcome our new families and hope this handbook will offer you adequate information about our program. Although our returning students may be acquainted with much of the handbook's information, we ask you to review it in preparation for the coming year.

We are very pleased to have you with us and hope that you will always feel welcome at Balsam.

We want to stress that communication is the most important aspect of a successful school. Please help us ensure that ours is an open and honest environment.

8 POINTS TO REMEMBER

.....

Virtually every child comes to school eager to learn and we want to keep this urge to learn alive in every child. We believe in providing resources such as books, learning materials, and educational technology. In the world today, children need to become proficient in the use of computers and related technology as tools to accomplish a myriad of tasks.

Finally, we believe in working with parents to encourage our students to adopt qualities of living which lead to success long after formal schooling has ended. These include universally accepted "success orientations" of trustworthiness, kindness/politeness, responsibility, independent endeavour, concern for others, group interaction, and aesthetic appreciation.
