## Elocution Contest

The Elocution Contest for grade 5 children on the topic of effects of natural disasters and safety measures was held on 01.02.2023. The contest was aimed at promoting the students' awareness and knowledge on the topic, as well as to enhance their public speaking skills.

Each child spoke for minute on the effects of natural disasters such as earthquakes, hurricanes, and floods, and the safety measures that can be taken to mitigate these disasters.

The students demonstrated a high level of involvement, confidence, and knowledge on the topic. They spoke with passion and conviction, and their delivery was engaging and informative. They provided real-life examples of natural disasters and their effects on communities and highlighted the importance of preparedness and safety measures.

The students also showed good time management skills, making use of their time effectively to deliver their speeches. They were able to organize their thoughts and ideas logically and presented them in a clear and concise manner.

In conclusion, the Elocution Contest was a great success, and it was evident that the students had put in a lot of effort and hard work in preparing for the contest. The event showcased the students' speaking skills, as well as their knowledge and awareness on the effects of natural disasters and safety measures. The contest provided a valuable learning experience for the students, and it was a proud moment for their families and the school.

# Parent Teacher Committee Meeting

The second Parent-Teacher Committee (PTC) meeting was held on 17th February to discuss various topics related to the upcoming academic year of 2023-24. The meeting likely covered several important issues, including the plan for the new academic year, the status of fee payments from parents, the constitution of the PTC, and the appointment of special committee members to oversee the committees like E magazine committee, School Disaster Management Committee, Event and Cultural Committee, Health and Wellness Committee, Assembly and Broadcasting and Outbound Learning Committee for the upcoming academic year.

Ms. Girija from Xseed elucidated the 5 step method and 6 elements of Xseed, continuous training and support to school by the team, parental approach at home and the developments Xseed brings in children. She clarified the parents' queries at the end of her presentation. Overall, the meeting created a platform for parent teacher members to be aware of the plan for 2023-24.

On February 14th, 2023, Grade 4 students went on a field trip to a local poultry farm. During the visit, they learned about the different methods used in farming, how the farm is maintained, the types of food provided to the chicks in different stages, the ways of vaccination and the days they vaccinate them, the number of days it takes for the

## A visit to a Poultry Farm

chickens to grow, and the way they sell the chicken. The students were introduced to the process of rearing poultry and were given an overview of the farm's operations. The farm had different sections for various stages of growth, including a hatchery, a brooding area, and an adult chicken section. They saw different types of chickens and learned about the various breeds. The students observed how the farm was maintained, and they learned about the importance of keeping the chickens in a clean environment. They were shown how to properly clean and sanitize the coops and the feeding troughs. The students were interested to learn about the number of days it takes for the chickens to grow and be ready for sale. They were informed that it typically takes between 4-6 months for a chicken to reach its full size and be ready for sale. The students were shown the different ways in which the farm sells their chickens, including wholesale to supermarkets and retailers, and direct sales to individual customers. The trip was a great opportunity for the students to learn about the importance of animal husbandry and the role of farming in our food supply chain.

# AN EFT WORKSHOP FOR PARENTS

education, and offered tips on how to support their child's learning at home.

They also discussed the importance of preparing students for college and careers in the 21st century. They emphasized the need for students to develop critical thinking and problem-solving skills, as well as the importance of building a strong foundation in math and science.

The workshop was well-received by the parents in attendance. Many of them logged out with a renewed sense of purpose and a better understanding of how to support their child's education and choosing the right school.

On 3rd February 2023, around 16 parents attended for a workshop on Education For Tomorrow. The workshop was led by the Vice-Principal and Level Monitors. They began by discussing the changing landscape of education, including the increasing importance of technology in the classroom and the shift towards more personalized learning experiences. They emphasized the need for parents to stay informed and involved in their child's

Class parents meetings for grades 1-8 conducted between 22nd February and 25th February 2023. The parents were informed the various changes and important information related to their children's education, discussed the general issues faced by children and adults in the school community, key dates for fee payment and distribution of learning materials, academic performance, discussions about the accolades and failures of beyond academics. These meetings provided an opportunity for teachers and school

## Class parents meeting

administrators to discuss academic and social goals for the year, share curriculum changes, and address the concerns and issues that parents had. One of the highlights of the meeting was the parent teacher committee member from each class partnered with the HRTs in conducting the meetings. It also provided a platform for school to update parents about the school's policies, plans and changes for the upcoming academic year.

# STEAM Fair

On February 28, 2023, the STEAM (Science, Technology, Engineering, Arts, and Mathematics) Fair was held at our school to foster scientific curiosity and a passion for learning in our students. The event was a resounding success, with over 200 students, teachers, and parents attending.

The fair consisted of a variety of activities, including poster presentations, live demonstrations, interactive activities, speeches, and debate. Students from all grades participated, showcasing their knowledge and skills in a range of STEAM-related topics. The exhibits were engaging, informative, and visually appealing, showcasing the students' creativity and ingenuity.

The fair was broadcasted by students, who provided live coverage of the event, interviewing participants and capturing the highlights of the fair. This was a fantastic opportunity for students to develop their communication and media skills while learning about science and technology. In the poster presentations, students displayed their research projects on a wide range of topics, including renewable energy, robotics, space exploration, and climate change. The presentations were well-structured and informative, providing an excellent opportunity for students to practice their communication skills while showcasing their knowledge.

Overall, the STEAM fair was a fantastic success, providing an excellent opportunity for students to showcase their knowledge and skills in STEAM-related fields. The event encouraged scientific curiosity and fostered a passion for learning, helping to prepare our students for the challenges and opportunities of the future.

## குதிரையும் கீரைப்பாத்தியும்

“இரட்டுற மொழிதல்” என்பது செய்யுள்களின் மிக அருமையான பகுதியாகும். ஒரு வரிக்கு இரு பொருளை உணர்த்தக்கூடிய நயமே அதன் தனிச்சிறப்பாகும். அவ்வகையில் ஏழாம் வகுப்பின் இயல் ஆறில் உள்ள ‘குதிரையும் கீரைப்பாத்தியும்’ என்ற சிலேடை வடிவில் அமைந்த செய்யுள் பகுதியின் கற்பித்தலைத் தொடர்ந்தும் அந்த இயலின் உரைநடைப்பகுதியான “பேசும் ஓவியங்கள்” என்னும் பாடத்தையும் ஒருங்கிணைத்த செயல்பாடாக செய்யுளின் பொருளை ஓவியங்கள் மூலம் வெளிப்படுத்தும் செயல்பாட்டினை 08.02.2022 அன்று செய்து வருமாறு அறிவுறுத்தப்பட்டது. மாணவர்கள் ஆர்வமுடன் தங்கள் படைப்புகளை வகுப்பில் காட்சிப்படுத்தினர். அவர்களின் புதுமையான சிந்திக்கும் திறனையும் படைப்பாற்றல் திறனையும் அற்புதமாக வெளிக்கொணரும் செயல்பாடாக இது அமைந்தது. ஓவியங்களின் வகைகளை மாணவர்கள் அருமையாக வெளிப்படுத்திய விதம் பாராட்டுக்குரியதாக அமைந்தது.

## STC Meeting

The school transport committee plays an essential role in ensuring the safety and timely arrival of students to and from school. They work closely with the school administration, parents, and transportation providers to ensure the smooth operation of school transport services. The second school transport committee meeting was held on 17th February 2023. The members were informed about the resolutions passed by school management committee, the administrative challenges that have arisen in the transportation of students, the accomplishments achieved in the past and upcoming plans to improve transportation services for students, the important transport dates and the constitution of the school transport committee for the upcoming academic year, 2023-24. Overall, the meeting was clear, concise, and informative, provided a detailed information of upcoming year.

# Safal Pilot Exam

The SAFAL exam aims to help students learn more effectively and to measure their progress over time. It also helps teachers to understand the strengths and weaknesses of their students, and to provide individualized support as needed.

By conducting assessments like SAFAL, schools can improve the

quality of education they provide to their students. The results of these assessments can be used to identify areas where students need more support, as well as to measure the effectiveness of teaching strategies and curriculum.

A pilot exam was conducted by CBSE for Grade 5 and Grade 8 students. The focus of the assessment was to test the core concepts, application of knowledge, and higher order thinking skills of the students. They participated enthusiastically and demonstrated their ability to apply their knowledge and higher order thinking skills. This assessment will help schools to improve the quality of education they provide to their students and to measure their progress over time.

Role-playing is an excellent tool for children to learn about different aspects of the environment and its impact on our health and well-being. Engaging in role-playing activities about air, water, and noise pollution can help children understand the causes and effects of pollution, develop critical thinking skills, and learn about the importance of protecting the environment.

Children acted out various scenarios to demonstrate the different types of pollution and their effects on the environment. They acted out a scene in which factories emit smoke

## Role play

into the air, leading to air pollution and respiratory problems for people and animals. In another scene, they showed how water pollution occurs when people dump trash or chemicals into rivers or oceans, leading to harm for aquatic animals and making the water unsafe for humans to drink or swim in. Finally, in a noise pollution scene, they acted out a noisy construction site or loud music that disturbs the peace and causes stress for people and animals in the area.

Overall, a roleplay about air, water, and noise pollution would be a creative and engaging way for grade 4 children to learn about the importance of protecting the environment and taking action to reduce pollution.
